DETAILED ACTION

This Examiner's Amendment and Examiner's Reasons for Allowance action are in response to the filing of 05/18/2009.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Claim 77 line 24 replace "operative" with "...configured...";

Allowance

2. Claims 1-41, 45, 47, 68, 70, & 80 have been cancelled.
3. Claims 42-44, 46, 48-67, 69, 71-79, & 81-84 have been amended with written arguments which overcome the examiner's prior rejections and objections, see paper of 05/18/2009. Examiner withdraws all outstanding rejections and objections to Claims 42-44, 46, 48-67, 69, 71-79, & 81-84.
4. Claims 42-44, 46, 48-67, 69, 71-79, & 81-84 are allowed.

Examiner's Statement of Reasons for Allowance

5. Prior art was found which disclosed utility meter and submetering system [e.g. Selph et al. (US-4804957-A)] and using cryptography to protect secure computing environments [e.g. Shear et al. (US-6157721-A)] and event auditing system [e.g. Schneier et al. (US-5978475-A)].

- The following is an examiner's statement of reasons for allowance:
- The prior art of record does not teach or render obvious the limitations as recited in independent Claims 42, 65, 77, 83, & 84, specific to, "a memory coupled with said processor, said memory configured to store confidential data, said confidential data comprises a private key configured to sign said energy management data" and "said processor is further configured to appear to make a change to said at least one device setting after said seal tamper detection unit detects that said tamper prevention seal indicates that unauthorized access has occurred, but is operative to maintain a first copy of said at least one device setting as if no change was made and further operative to maintain a second copy of said at least one device setting based on a change" and "said processor is further configured to prevent said transmitting of signed energy management data through said network interface when said seal tamper detection unit detects that said tamper prevention seal indicates that unauthorized access has occurred".
- Dependent claims are allowed as they depend from an allowable independent claim.
- Therefore, the Examiner considers the combination of the above limitations with the remaining limitations of each independent claim as applied to tamper proofing and securing an energy management system/apparatus, such as a utility meter, as the non-obvious novelties of the invention.

Art Unit: 2436

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
